

We've got you covered.

COVR Medical garments were invented by a surgeon to ensure patient privacy, dignity and comfort during medical and surgical procedures as well as for post-procedural care.

Our products.

Designed to meet the needs of both the patient and the medical staff, COVR garments provide complete coverage of the patient (front and back) while allowing procedural access to the hip, groin, thigh and other areas of the pelvis. In addition, COVR features:

- soft, comfortable, non-woven material
- breathable, moisture wicking fabric
- highly adjustable fit
- available in adult and pediatric sizes
- unisex, stay-in-place designs
- individually packaged and single-use convenience
- radiolucent garment
- not manufactured with natural rubber latex

With the growing importance of Patient Satisfaction, as a part of CMS' Quality of Care reimbursement system, COVR provides an easy-to-implement program to enhance the patient care experience.

Our promise.

We take pride in the quality of our COVR products which are:

- manufactured in ISO-certified facilities to the highest standards
- designed in accordance with FDA Guidelines and regulated as a Class 1 Medical Device
- tested to global standards for Biological Evaluation
- meets NFPA fire standards
- quality guaranteed

HALF SHORT

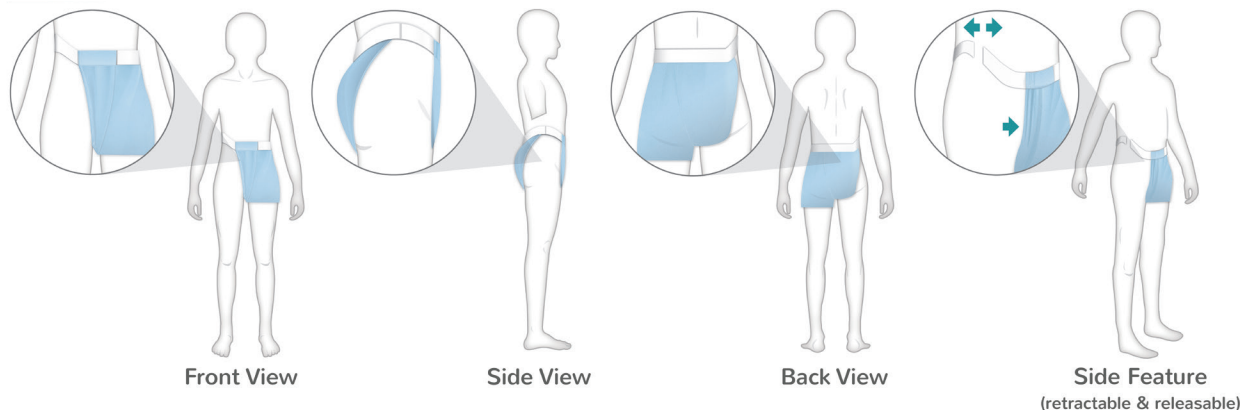

Features:

A retractable front panel and a releasable waistband for patient preparation and procedural access

Full coverage – front and back

The product is reversible for use in either left-sided or right-sided procedures

REVERSIBLE, RETRACTABLE, RELEASABLE

For medical and surgical procedures requiring access to either Left or Right hip, pelvis and groin regions. For example: Venous Ultrasound/ Ablations, Vascular Surgery, Total Hip Arthroplasty, Hip Arthroscopy, Hip Injections / Aspirations, MR Arthrograms, Hip Fractures, Pediatric Surgery, Total Knee Arthroplasty, and many other procedures that require access to one side (Left or Right).

BILATERAL
